

## CENDRA RAMIREZ, RLA, ASLA, LEED AP

A talented designer and skilled project manager Cendra Ramirez joined our team at Wimmer Yamada and Caughey after obtaining her Masters Degree in Landscape Engineering in Angers, France. Her international perspective, through her studies in Europe and her extensive knowledge of French culture, adds to the creativity and uniqueness of each project she works on. Also fluent in Spanish, Cendra is currently the project manager on a high-end corporate retreat center located in Ensenada, Mexico. Her wide range portfolio includes the award winning Master planned Del Sur Community, mixed-use projects such as Hazard Center and corporate campuses such as Pacific Center. She's also developed a relationship with the Port of San Diego in creating a pilot project to replace turf to a drought tolerant plant palette. This successful project which provided water saving to the Port of San Diego was extended to five other sites.

Ms. Ramirez is fully versed in site design, land planning and irrigation design. Her avid interest in the latest innovations and green aspects keep her on the cutting edge of green roof and green wall technologies. Cendra helps realize the highest level of sustainability to each project by keeping up to date with a variety of best management practices.

Ms. Ramirez collaborates daily with design team members, contractors and clients ensuring critical communication for project success. Ms. Ramirez is very knowledgeable in terms of City and County regulations and codes and has developed excellent working relationships with the City of San Diego staff throughout the duration of her efforts here at Wimmer Yamada and Caughey.

Ms. Ramirez's background in the field of landscape architecture and diverse understanding of cultural design makes her a valuable asset to any project team and collaborative effort.
